

Understanding Java Code Execution

Step-by-Step Walkthrough

Programming Tutorial

Code Execution Flow

```
2 public class Main {  
    public static void main(String[] args) {  
        System.out.println("Hello World: 1");  
    }  
}
```

Code Execution Flow

```
public class Main {
```

3

```
    public static void main(String[] args) {
```

```
        System.out.println("Hello World: 1");
```

```
        System.out.println("Hello World: 2");
```

Code Execution Flow

```
public class Main {  
    public static void main(String[] args) {  
4      System.out.println("Hello World: 1");  
        System.out.println("Hello World: 2");  
        System.out.println("Hello World: 3");  
    }  
}
```

Code Execution Flow

```
public static void main(String[] args) {  
    System.out.println("Hello World: 1");  
    System.out.println("Hello World: 2");  
    System.out.println("Hello World: 3");  
    System.out.println("Hello World: 4");  
}
```

5

Code Execution Flow

```
System.out.println("Hello World: 1");  
System.out.println("Hello World: 2");  
6 System.out.println("Hello World: 3");  
System.out.println("Hello World: 4");  
System.out.println("Hello World: 5");
```

Code Execution Flow

```
System.out.println("Hello World: 2");  
System.out.println("Hello World: 3");  
7 System.out.println("Hello World: 4");  
System.out.println("Hello World: 5");  
System.out.println("Hello World: 6");
```

Code Execution Flow

```
System.out.println("Hello World: 3");  
System.out.println("Hello World: 4");  
8 System.out.println("Hello World: 5");  
System.out.println("Hello World: 6");  
System.out.println("Hello World: 7");
```

Code Execution Flow

```
System.out.println("Hello World: 4");  
System.out.println("Hello World: 5");  
9 System.out.println("Hello World: 6");  
System.out.println("Hello World: 7");  
System.out.println("Hello World: 8");
```

Code Execution Flow

10

```
System.out.println("Hello World: 5");  
System.out.println("Hello World: 6");  
System.out.println("Hello World: 7");  
System.out.println("Hello World: 8");  
}
```

Code Execution Flow

```
System.out.println("Hello World: 6");  
System.out.println("Hello World: 7");  
11 System.out.println("Hello World: 8");  
    }
```

Code Execution Flow

```
System.out.println("Hello World: 7");  
System.out.println("Hello World: 8");
```

12

}
